

## Superior Gaze Correction

The first few Superior Blythes (pow wow poncho, superior skate date, silver snow, velvet minuet) released by takara were manufactured with an extra-long T-bar, causing them to look “slightly down”.

To correct this effect, remove the T-bar from inside her head (refer to eye removal).

By sanding or cutting about 1mm off of the end of the T-bar, her eyes will rest in a higher position when her string is pulled.
